Filed: February 16, 2001

For: SWING ARM FOR TWO-WHEELED
MOTOR VEHICLE AND METHOD OF
PRODUCING THE SAME

)
)
) Examiner: Depumpo

)
) Art Unit: 3611

RECEIVED

APR 10 2002

GROUP 3600

RESPONSE TO OFFICE ACTION OF MARCH 11, 2002

Assistant Commissioner for Patents
Washington, D.C. 20231

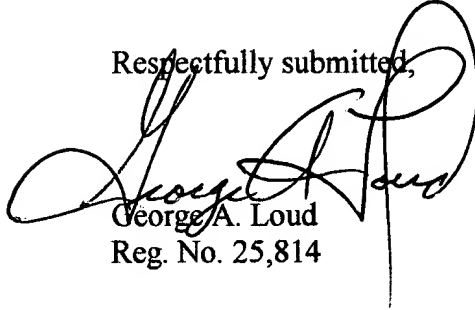

Sir:

Responsive to the office action of March 11, 2002, applicants, by their undersigned attorney, hereby elect method claims 13-22 (group II). Further, applicants elect fig. 21 as a species. It is respectfully submitted that all of the elected method claims, as well as product claims 1-9 and 12 read on fig. 21.

The restriction requirement is respectfully traversed. More specifically, applicants believe that the examiner errs in his conclusion that "the species listed above do not relate to a single general inventive concept under PCT Rule 13.1..." It is respectfully submitted that one of the general inventive concepts embodied in applicants' claims is that of the filling per se, i.e. the concept of filling either one or both of the hollow portions of the arm and the body portion with

a foam resin in order to reduce noise due to resonance with engine vibrations. Reconsideration is respectfully requested.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "George A. Loud", is written over the typed name and registration number. The signature is fluid and cursive, with a large loop at the end.

George A. Loud
Reg. No. 25,814
